Whatcom County does not license Hydrogeologists. This listing is for your convenience only, and consists of those licensed hydrogeologists that have a Whatcom County mailing address. Whatcom County does not endorse or recommend any hydrogeologist nor does this list provide warranty or assurance of quality. It is recommended that you contact more than one contractor for bids.

This list may not be up to date or complete. Check the Washington State Department of Licensing website at: https://fortress.wa.gov/dol/dolprod/bpdLicenseQuery/ to see if the license is listed as active or to search for other licensed professionals. If the license is inactive at any time during the water availability process, it could stop or impede review of your application. To contact the Department of Licensing or file a complaint: http://www.dol.wa.gov/forms/formscomplaint.html.

Department of Licensing, Business & Professions Division
P.O. Box 9034, Olympia, WA 98507-9034
(360) 664-1440

As per Whatcom County Code 24.11, in order to use a permit-exempt well for a project permit, the applicant must provide documentation of legal water availability or evidence that the project will not impair any senior water rights, including instream flows per WAC 173-501. Provide one or more of the following:

a. A study by a WA State licensed hydrogeologist demonstrating that the proposed well would not impair any senior water right, including instream flows.

b. A mitigation plan prepared by a WA State licensed hydrogeologist demonstrating that the proposed well, with mitigation, would not impair any senior water right, including instream flows.

Review of legal water availability documentation may require a third party review. The cost of the third party review will be at the expense of the applicant.
