990 Lake Whatcom Blvd. APN: 370420475090, 370420488084

Additional information.
RE Jet ski and small sailboat mooring options.

Per your Request on details of the mooring for the Jet ski or small sail boat I have attached 3 options to show what might work to secure the jet ski to the dock.

One is to simply tie the nose of the craft to the dock and the tail of the sail boat to a small pipe pile in the lake shore. This would require a 2 inch steel pipe to be pushed into the lake bottom. It would have a small float that would allow the smaller sailboat or jet ski to remain secure as the water level would rise and fall.

For the Jet ski if this option would be approved we would like to offer as an option, the Glide-n Ride Floating jet ski dock or the SLX6 wave port PWC roll on floating dock that would attach to the existing dock in the wildwood marina.

We would only have these out during the boat season and stored for the off season. The dimensions are 64" wide and 132" long. **Please see attached pictures and details.**
