

300FT AERIAL BUFFER

# OBSERVE NO-SPRAY BUFFERS SAVE SALMON

PROTECTED ZONE

60FT GROUND BUFFER

No-spray buffers along designated salmon-bearing streams in Washington, Oregon and California are required for pesticides containing the active ingredients **bromoxynil, carbaryl, chlorpyrifos, diazinon, malathion, methomyl, metolachlor, prometryn, and 1,3-dichloropropene.**

Buffers are required adjacent to streams, ditches, and estuaries supporting threatened or endangered salmon or steelhead. Go to Salmon Mapper, an online mapping tool at <http://www2.epa.gov/endangered-species/salmon-mapper> to find if you have waterways included in these mandatory buffers.
