**Subject:** Carl Weimer"s amendments to the Cherry Point UGA  
**Date:** Monday, July 04, 2016 8:55:40 AM

---

Dear Councilmembers,

I fully support Carl Weimer's amendments to the Cherry Point UGA, As the decision from the Army Corps of Engineers made clear it would be impossible to have a fourth pier at Cherry Point that would not interfere with the treaties our government made with the Lummi Nation to protect their fishing rights. Carl's amendments strike a good balance—protecting the rights of the existing industries while protecting the area from further expansion of fossil fuels projects. It is time we took a stand at Cherry Point once and for all and say we are want to protect our water and air for future generations. It is past time to recognize we are not open for just **any** industry in Whatcom County. The science is clear—global warming is here and this is a reasonable step in our own community to change for the future.
