Stone, Mark, P.E.	Ferndale	WA	360-228-5788
VanderVeen, Robert Anthony	Custer	WA	360-384-6333

Whatcom County does not license designers or engineers. Any on-site designer or professional engineer, licensed in the state of Washington, may design on-site sewage systems. Further information can be found at the websites listed below. This listing is for your convenience only, and consists of those licensed designers that have a Whatcom County mailing address. Whatcom County does not endorse or recommend any designer nor is a guarantee of permit approval expressed or implied through the services of any designer or engineer.

Typical responsibilities of a sewage system designer can include designing the sewage system, communicating with installers during construction, making additional site visits if problems arise during construction and inspections of construction so that the designer can prepare a record drawing (as-built) of the sewage system. The record drawing of final construction is required for final construction approval and before home occupancy.

We have added telephone numbers of those individuals that have provided us with that information. This list may not be up to date.

Check the Washington State Department of Licensing website at <https://professions.dol.wa.gov/s/license-lookup> to see if the license is listed as active. You will need to [login](#) with your Secure Access Washington (SAW) account or [create a new account](#).

If the license is inactive at any time during the permit application review process, it could stop or impede the review and approval of your permit.

To contact the Department of Licensing or file a complaint: <http://www.dol.wa.gov/forms/formscomplaint.html>
