

Draft mission statement:

Develop an integrated floodplain management plan for the Lower Nooksack River that will reduce risk to public safety, property, and infrastructure, and support and enhance viable/sustainable/improving agricultural and fisheries economies.

Draft Goals:

- Reduce risk to public safety
- Minimize damage to public and private property and to public resources
- Provide a comprehensive understanding of the river
- Restore floodplain habitat formation processes and other environmental benefits where possible
- Build consensus around mutually beneficial outcomes
- Create a more resilient flood risk reduction system now and in the future
- Identify and prioritize a list of action items to implement plan
