I am a veteran and was born at sandy point near the terminus of the new tar sands project Trudeau is trying to ram down our throats.

I served this country to prevent foreign invasion and damage to our lands. Please find it in your hearts to stand up against any new infrastructure in the region. We look to you as community leaders. Don't betray the sacrifice of so many of my friends. We must transition to alternative energy if we hope to avoid climate disaster and whatcom country can lead this process.

Thank you for your work on this.

Graham
