Subject: Please continue our legacy of protection at Cherry Point

Dear Council Members,

I am contributing my voice to the extension of your wise choices around preventing further permitting and expansions of shipping unrefined oil and other fossil-based energy resources at Cherry Point. Your current efforts at extending the moratorium on permitting and creating a more permanent land use ordinance will hopefully solidify our community's commitment to reducing potential harm to our area's environmental and economic health.

Fisheries, recreational boating, whale watching, diving and many more activities are all furthered by wise land use policies. Our quality of life in Whatcom County should be guarded carefully. So me and my 2 young children thank you for ensuring long-term, wider and fairer use of our water, land and transportation systems, rather than continuing to subsidize the climate-changing fossil-fuel energy resources.

With appreciation,

Jason Darling
