Subject: Cherry Point Moratorium

Dear Council Members

I'm writing to urge you to move forward with approving the Cherry Point Moratorium on added fossil fuel export facilities. Those who so vehemently oppose this in the name of jobs are working to undermine our long term economic health and stability in the name of short term profits.

I find it timely to add that similar climate change deniers were instrumental in weakening CAO building restrictions in Hurricane Storm Surge areas impacted by sea level change (Wall Street Journal 9-13). Now that Hurricane Florence is devastating Billions of Dollars in low lying coastal new construction, it will be the tax payers and insurance policy rate payers who pay the price for the profiteers.

Please continue to stand up for us at Cherry point and (just as importantly) in the upcoming SMP update.

Jim Hansen
