

***Incarceration Prevention and Reduction Task Force
Information Needs and Data Exchange Subcommittee
Meeting Summary for June 6, 2018***

1. Call To Order

There was no quorum for this meeting. Committee members present began discussing the agenda items 1:30 p.m.

2. Continue discussion on data access capabilities: Update on data work group: data availability and report templates

Peterson stated the workgroup is still actively working on finalizing custom reports.

3. Next steps for INDEX Committee

Committee members discussed the integration and data sharing among the jurisdictions, including allowing the courts of limited jurisdiction to use the State's Odyssey program. Members of the committee will continue to track and report on the State's progress in acquiring a new case management system.

Schroeder stated he would discuss with the Steering Committee the possibility of drafting a letter to the AOC. The letter would convey the value for all local jurisdictions in having the same system for all the courts and the potential for the County to use the Odyssey and Tyler Technologies Caseloadpro systems through Superior Court, Juvenile Court, and pretrial services, which would also benefit District Court and other courts of limited jurisdiction in the county.

Committee members continued to discuss the difficulty of developing accurate definitions, including the differences in defining booking charge vs. prosecution charge vs. final charge, if plea bargained. The end goal of the INDEX Committee is to get a system where everyone could share the same data and speak the same data language. The three remaining beginning tasks for the committee, identifying uncollected data, baseline data, and definitions, will be discussed at a future meeting.

Buchanan reported on the work of the Intergovernmental Policy Academy group, the proposed law enforcement assisted diversion (LEAD) program, and a recent inmate survey taken by the jail's GED instructor David Goldman. Committee members discussed the survey and also the thesis work of a graduate student interviewing inmates. Those resources will be available for more information on jail use data now and in the future.

Schroeder reported on the State's pretrial task force final report data recommendations. The INDEX Committee will look at the report in detail at the next meeting, including an evaluation of how the County is doing and what needs to be accomplished. There was discussion on barriers to efficient data
