Subject: interim ordinance and Cherry Point amendments

I am very concerned about the newly revamped amendments that are being proposed, because I do not understand why you dropped the previous ones you had been working on for so long and with such diligence. In my mind the ones that you set aside were excellent, and I encourage you to implement them.

I do not understand why you felt it necessary to redo the whole process. I hope you will explain that Tuesday night. Is your desired outcome the same? To protect our county from detrimental effects of fossil fuel industrial expansion? We need to ensure changes that involve substantially increasing ship transits, trains, and new pipelines are publicly examined and the consequences understood before being permitted. We need conditional use permits at a minimum and EIS's for projects with potentially large effects.

In the meantime, please do extend the interim moratorium.

Thank you for doing this work for the county.
