Subject: Fossil Fuel at Cherry Point

Dear Council Members:

When I visited the site this morning I see several versions of amendments to the code which I will try to review before tonight.

One thing I do know: Of the two resolutions listed for consideration, the one introduced on July 23 is much superior because it eliminates the absurd language reevaluating the allowed capacity of the refineries in light of the area population including Vancouver and notes the fracked fuel company's blatant attempts to enlarge the pier and increase shipping. It also tries to head off stalling by the staff, by requesting that they schedule additional meetings as needed.

Thank you for your work!
