To whom this may concern-

I work out at P66 and have for awhile now.

This is a good job that helps me support me and my children as I am a single mother.

This refinery is run safely and energy efficient. We are in the top % for clean refining for this industry. This would not be possible without the upgrades of different units and pieces of equipment, and new things added to existing units. Why you would try and put this comprehensive plan in play and prolong the process of updates and clean burning equipment is beyond me. You want clean air and to protect the environment but don't want things put in to place to allow this to happen? What sense does that make??

**I ABSOLUTELY OPPOSE THIS COMPREHENSIVE PLAN!!!!!!!!!!!!!!**

**I am encouraging all of my friends and family to email you guys or show up tonight to show opposition to this ridiculous plan!!!!!!!!!!!!!!**
