I would like to comment in favor of the Comprehensive Plan and zoning amendments regarding Cherry Point (resolution 2019-037). The changes have been carefully and fairly crafted, and are essential for the protection of public health and safety in Whatcom County. The changes in the Comp Plan and zoning for Cherry Point also provide, into the future, for the stakeholder public to be informed in a timely manner of developments or operations that potentially impact public health, safety, and the environment.

Please give Planning Commission approval to this important and necessary legislation.

Thank you.
