Subject: please forward to Planning commissioners concerning Sept 12 meeting
Date: Monday, September 16, 2019 10:04:37 PM

I was hoping to make your last public hearing on September 12, but could not attend. I wanted to write to show support for the draft ordinance that was to be discussed that ensures conditional use permits are required for changes of use and more specifically defining what the uses are. It is imperative that full analysis of all sorts of environmental, transportation, atmospheric, and marine effects of things like fossil fuel uses be thoroughly and publicly considered. I am most concerned of Cherry Point and Lake Whatcom impacts.

Thank you for your work on this,

Ted Matts
