Planning Commission Members,

As a long-time county resident, citizen and person concerned about the health and safety of Whatcom County and the country as a whole, I am asking you to reject any proposed future large industrial projects that might adversely affect the health and safety of this area. Also that existing industries are accountable for not increasing the health and safety of people and the environment in this area. I sincerely hope that in your review of proposed amendments that you will seriously consider public input and be open and honest with the public for the remainder of the review process. I beseech you to reject any new large fossil fuel developments that degrade our environment and the planet as a whole. We must take global warming seriously or future generations will suffer the consequences from our adverse actions.

Thank you for your consideration of the above,

Kenneth Russell

Whatcom County resident
