Subject: Cherry Point trans-shipment reforms:

Thank you for this opportunity to limit and provide accountability to the fossil fuel industry. America is now considered the largest energy producer in the world. In today's climate altered world, fossil fuel production and use must be limited and mostly stopped to prevent further harm to humans and all planetary life forms. It is still too early to stop all fossil fuel usage, but severely limiting its extraction, production, transportation and use is essential. I am hopeful that the Council will pass and strengthen the existing draft and become Environmental Heroes for Whatcom County, Washington State, America, and the World. Thank you again for getting all of us this far in the process.....keep up the good work!

Sincerely,

Dennis Smith
Deming, Wa.
