---

Commission Members,

I have recently moved to Whatcom County because of its natural beauty and strong public commitment to conservation of its environment. I believe that the proposed amendments to regulations governing the industrial development of Cherry Point are badly needed to reduce the likelihood of incidents of pollution such as other coastal areas have seen. I hope you will be strengthened in your resolve to protect the public interest, despite the organized campaign of self-interested parties to frighten you out of doing so.

Thank you for your service and your kind attention.

Minda Rae Amiran
