On behalf of RE Sources I am requesting to participate in open dialogue with stakeholders at the October 10th Planning Commission work session, which last night was agreed to be held in a round-table format. Please also notify us of the location for the meeting, as it was discussed that it might be held somewhere other than the Council Chambers. The Annex on NW is clearly too small a room to accommodate the number of interested parties, and even the garden room is.

I was glad to hear the Planning Commission approve a motion last night to hold a work session on October 10th in a round-table format to allow direct input and dialogue with stakeholders. This is exactly what we have suggested and requested numerous times both to council-members and industry stakeholders. Am I correct in understanding that this is the plan, and that there will not be a "public hearing" on the 10th as previously announced? Is it still required that there be another PC public hearing before the proposal moves back to council?

Thanks for your assistance in clarifying this process so that members of the public can be given fair notice and opportunity to engage.
