I wish to express my support for the Cascadia Law Group's draft plan and code amendments consistent with Whatcom County Council's Resolution 2019-004. While it is critical that Cherry Point land be used for economic development ensuring high quality jobs, it is equally important that such development be sustainable and protect the ecosystems and aquatic life of the surrounding land and sea.

The trans shipment of unrefined fossil fuels from current or new docks at Cherry Point would have significant adverse effects on the environment and possibly on the existing refinery jobs.
