Subject: Climate Action Task Force

Dear Council Members,

I applaud your vision in May 2018 when you created the Climate Action Task Force. The Task Force then with excellent leadership by David Roberts created a document that will be discussed at your December 9th meeting. I will not be able to attend but wanted to add my name to the list of Bellingham citizens who support your efforts into moving our city forward into the future of clean renewable energy. I believe the public will be behind you if we can respond with positive messages and facts rather than the false and misleading information the fossil fuel companies are feeding to our social media and the flyers put out by Cascade Natural Gas.

I was able to attend a few of the Task Force meetings and was very impressed on their level of engagement and the list of expert speakers and presentations in the various energy sectors. I am looking forward to hearing about your commitment to renewables for the City. Already 6 cities in the U.S: Aspen, Burlington, Georgetown, Greensburg, Rickport, and Kodiak Island, now generate 100% renewable energy resources and over 90 have pledged to do the same. We can and must do it here in Bellingham.

Sincerely,
Judith Akins
