Subject: RE: Identify data gaps for INDEX
Date: Friday, January 04, 2019 4:27:47 PM

Jill:

Here is the information that Bellingham would like to be able to collect through access to Spillman and not have to hunt down in various places:

- Ability to look up defendants to see which jurisdictions that the defendant is serving time for
- Ability to determine if defendants are serving with multiple jurisdictions and the estimated time of length of service for each
- Ability to track Temporary Releases
- Ability to see when a defendant has completed serving their sentence with another jurisdiction
- Ability to see release projections
- Ability to track daily population on a daily basis per jurisdiction at the same time on a daily basis
- Ability to track what percentage of the population is serving from each jurisdiction
- Out of custody work status
- Actual lists of defendants transferred on all transports (often there are some that are taken off the list for unknown reasons)

Thank you,

Darlene L. Peterson
