Subject: County issues

Please do a better job of convincing Inslee to open up this county. What an overblown joke this pandemic is. The fatality numbers are much less than what is being reported. And wearing cloth masks does nothing to prevent the spread of any diseases.

While we're at it, get cherry point up and running at full capacity. That area should be one of the best ports in America. We should be doing much more shipping of everything from there and creating thousands of jobs. Jobs which support this county and the communities in it. Stop using fake climate change as reason to stifle the economy of this region.

Liberalism/socialism/communism is the downfall of this country and anyone who supports those values or ideals should resign from public office.
