Please lift this "temporary" petroleum export moratorium on the Cherry Point industrial zone. Any type of future construction or modifications will require a significant amount of permitting and various reviews. Plus, there are already many existing pollution control emissions regulations for solids, liquids and gases which would apply.

Our Whatcom Co. families need jobs that can pay a living wage and provide full employee benefits. And our economy, including government, needs the revenue from business taxes!

Lastly, a "temporary" moratorium that has continued to be extended for four years appears disingenuous and paints our council in the distasteful light of a having an unrealistic, strong anti-business bias that is economically unsustainable.

Therefore, please discontinue extending this temporary Cherry Point moratorium.

Appreciatively,  
M/M Gary Jordan  
Assoc Director - Retired,  
Resource Management,  
Facilities Management,  
WWU
