Subject: Cherry Point moratorium

Honorable Councilmembers ,

Please continue the moratorium on permits that would allow more shipments of unrefined fossil fuels through Cherry Point.

This has been a long road, and you have been consistent in seeking a stable well-considered plan for our industrial zone. Many of the delays have not been because you were wasting time; please continue your careful consideration of a new zoning ordinance to manage development at Cherry Point.

Thank you for your patience and toleration of seemingly interminable process.

Peter Willing
