Please get rid of the extremely unnecessary growth moritorium on BP Cherry Point PLEASE and thank you. BP Cherry Point provides not only hundreds of jobs that are well paying family jobs directly but even more important thousands of jobs in a ripple affect throughout the county through various sub contractors. Plus Osha, coast guard, state and local government, wisha, EPA requires BP Cherry Point to abide by extremely strict rules, regulations, and guidelines including air, land, and marine, etc. So with any logical thinking with the extremely stringent rules and regulations that they have to strictly abide by especially being right next to the ocean (pollution concerns) why put on them more restrictions and extend the expansion moritorium. The moritorium needs to be abolished so they can keep providing well paying jobs for families both directly and indirectly along with the ripple affect jobs that are created throughout the county. Plus with the extra jobs that are created not only is it providing more jobs but it's also creating more revenue for the county and state through additional taxes from the expansion at BP and by the extra jobs it creates: the additional taxes from the extra employees from the new jobs. So I beg you to please relinquish the expansion moritorium on BP Cherry Point.
