Whatcom County Planning Commissioners,

Thank you again for lending your experience and perspectives in service to our community. I'm glad that you are now able to safely begin work again, and I'm looking forward to tomorrow night's meeting.

The proposed Cherry Point ordinance has covered a lot of ground in the past year, and I think your work has helped to clarify the process and the really important decisions. Stand.earth has just published a blog post that we will be sharing more widely in the community and to other County leaders in the near future. In it, we discuss the value of the progress that has been made and the areas that we believe still need work.

I hope that you will take a look and consider these ideas: <https://www.stand.earth/blog/fossil-fuel-free/its-time-protect-cherry-point>

I'm happy to answer any questions you have.

Warmly,

--
