SEE SIGNS OF OPIOID OVERDOSE?

- soft / no breath
- pinpoint pupils
- blue lips and skin
- vomiting
- limp body
- not responsive
- cold and clammy skin
- slow, absent pulse
- choking sound or snore-like gurgling noise
- awake but unable to talk

CALL 911

Be a good Samaritan!
If you suspect an opioid overdose, administer naloxone, call 911, and administer CPR.

Under Washington’s “911 Good Samaritan” Law, if you think someone is overdosing and you seek medical help for the victim, neither of you will be charged for possessing or using drugs.

The Good Sam Law will not protect you from being arrested for
- outstanding warrants
- probation or parole violations
- drug dealing
- crimes other than drug possession
